Customer Value Management Strategies: 360° Customer Assessment and Decision Making

Matthys Rossouw
Gottfried Steiner
Senior Business Consultants

Customer Value Management

A smiling man and woman are standing in a modern kitchen. The man is wearing a blue t-shirt and has his arms crossed. The woman is wearing a pink shirt. The kitchen features white cabinets, a marble backsplash, and a wooden shelf with various dishes and vases. A refrigerator is visible on the left side of the frame.

Customer value management strategies help you make better, **‘in the moment’** decisions powered by the **whole customer context.**

Customer Insight / 360° Perspective → Focused Customer Management

Understand Customer in Order to Meet Customer Expectations

Customer Expectations

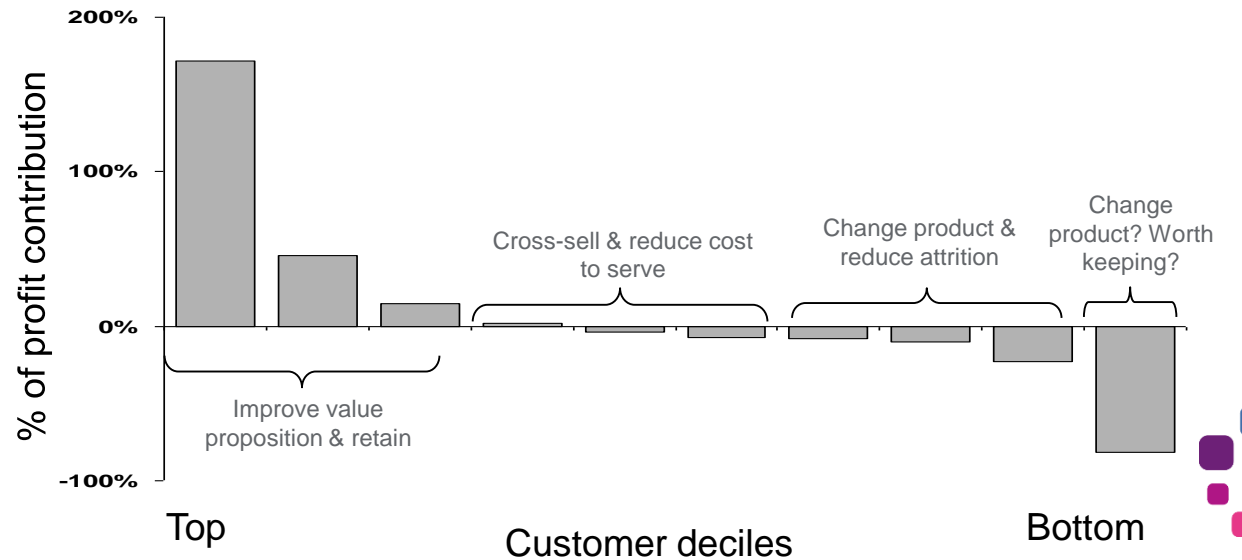

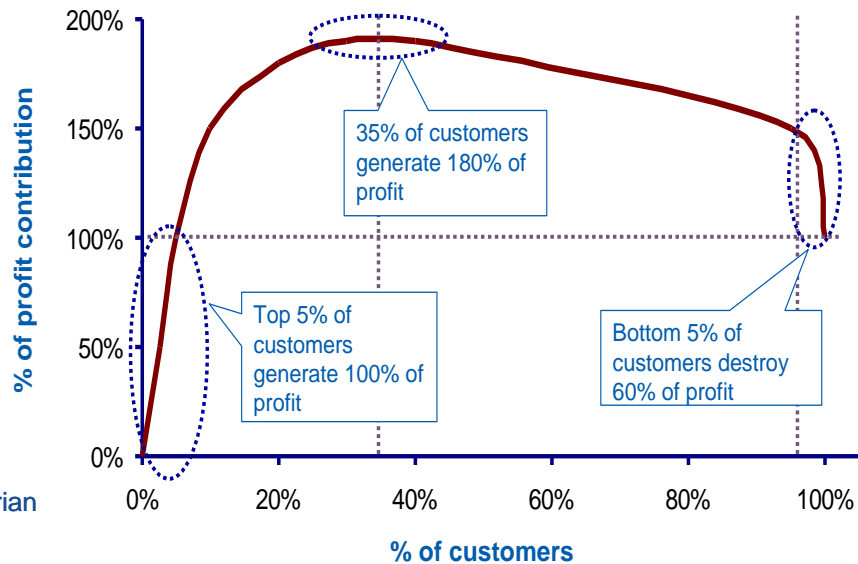

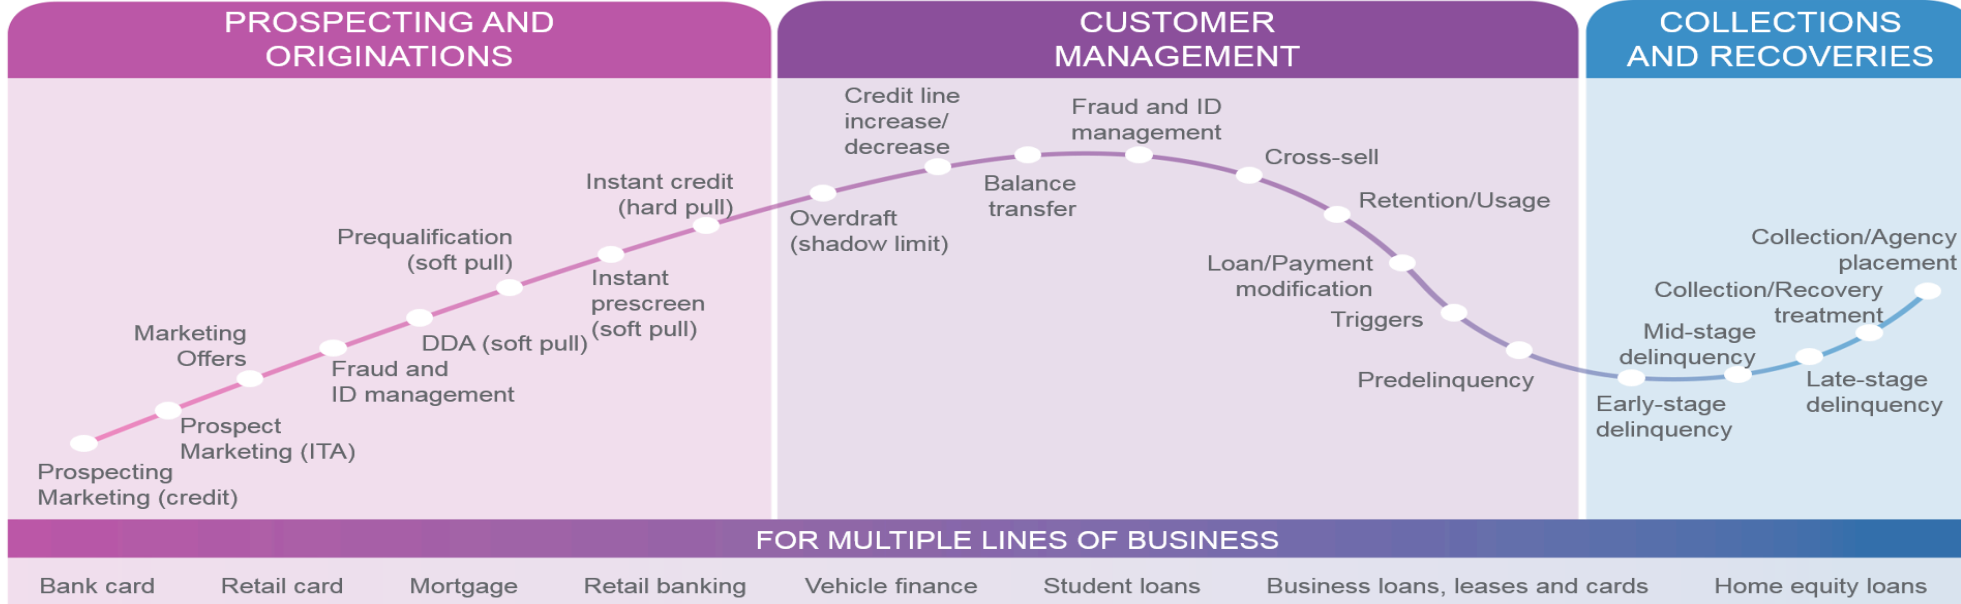

- Understand and treat me like an individual. I am unique
- Anticipate what I need & offer it when I need it
- Make it easy to deal with you
- Treat me fairly and transparently
- Help me achieve my goals

Client Challenges

- Predicting and monitoring changes in affordability & vulnerability
- Liberating Data, Insight and Knowledge from untapped Silos
- Understanding and making decisions on future lifetime value as well as risk
- Understanding & responding to changes in sentiment and satisfaction
- Making the most of open data and alternative data source
- Creating market-leading, automated digital customer journeys

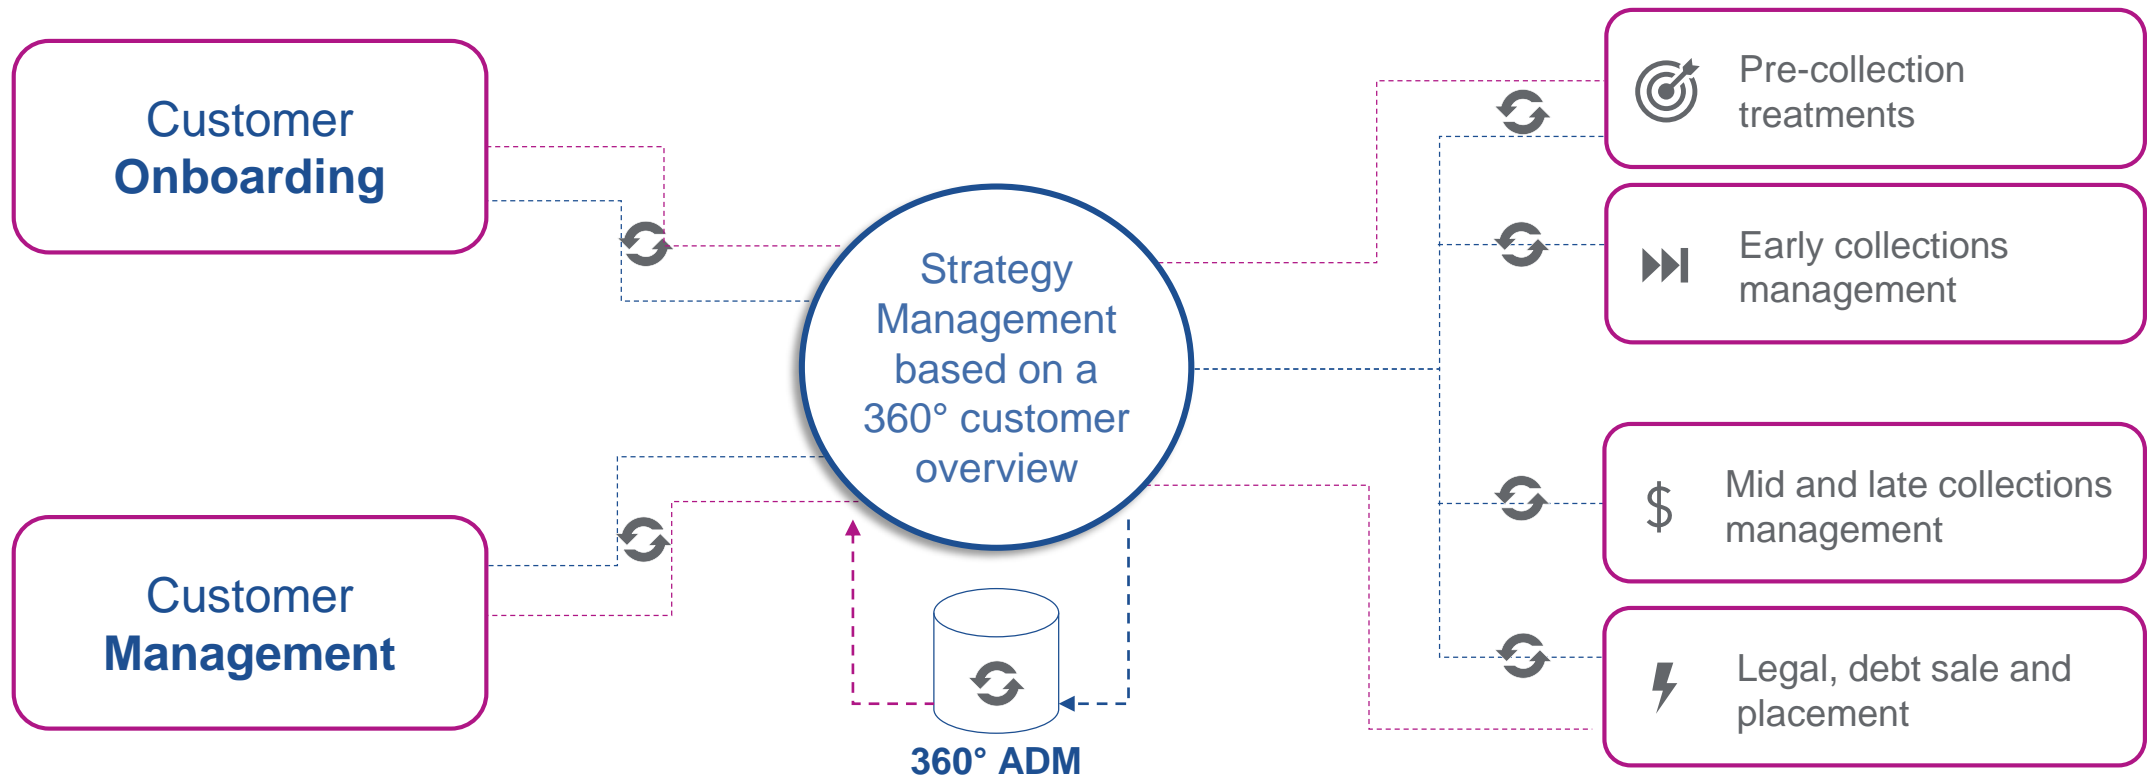

What do we mean by CVM and why is it important?

PCSM allows for end-to-end decision automation

Strategy optimisation based on a 360° customer overview is at the heart of customer value management. It monitors the customer holistically and allows you to continually adjust and improve individual/overall strategies

Decision Making in Customer Management

Use Case: How PCSM Strategies feed Customer Centricity (CRM view)
